

HEALTH TRADE SERVICES
The Backbone of Health

Healthcare facilities. Infrastructure. Construction.

Specialist maintenance, technical infrastructure and coordinated building works for hospitals, health services and clinical environments.

Consultative services & project advisory

Site assessments, practical options reviews and scope development. Advice connecting existing conditions, operational needs, trade interfaces and procurement requirements with a deliverable scope.

Healthcare project management

Scope, programme, trade and stakeholder coordination. Defined responsibilities, progress communication, change tracking and completion planning for healthcare upgrades, refurbishments and work packages.

Facilities management & maintenance

Planned and reactive maintenance, building fabric and grounds upkeep, asset identification, condition records and practical defect rectification. Ongoing trade support is scoped around the facility's requirements.

Healthcare infrastructure & technical services

Electrical and essential power, patient-area installations, nurse-call and communications infrastructure, clinical equipment connections and controlled shutdown/changeover works.

Refurbishment & construction

Clinical room alterations, fit-outs, partitions, joinery and finishes. Coordinated building-services packages, access improvements and external works, supported by specialist delivery partners where required.

Compliance & asset assurance

Patient-area electrical testing, RCD testing, emergency lighting, asset-register information and clear findings. Testing requirements, reporting and rectification responsibilities are agreed for the scope.

Working in operational healthcare

We confirm the scope, access, work windows, trade interfaces and handover requirements with your team. Experience spans multi-trade clinical refurbishment, hospital electrical changeovers and asset-information programmes. Products and procurement support the agreed works.

Indigenous ownership & procurement

100% Indigenous owned. Supply Nation Registered and NSWICC Assured. Current registration, insurance and relevant onboarding documents are available on request. Based in NSW; coverage, scheduling and specialist requirements are confirmed for each engagement.
